Green Gear: Style

« [Bottle of Steel](#)

Out of the (Plastic) Bag

Ditch those plastic dry-cleaning bags for the [Clothesnik](#), a 100 percent cotton garment bag made specifically for eco-minded folks whose clothes need a little extra TLC. With a zipper down the front and a drawstring at the bottom, it's the perfect thing for round-trip runs: Use it like a laundry bag to bundle and tote dirty duds to the cleaners; when they're finished, the clothes come back clean and ready to go, hanging in the same bag. Plus, using the Clothesnik helps reduce some of the more than 100 billion plastic bags thrown away each year AND there's a great story behind the bag's creation. Want to know more? Check out [reuseniks.com](#).
